

# Evidence for Faith

## Why Biblical Christianity is True and all Opposing Views are False

1. Truth is knowable. Some knowledge is self-evident and/or undeniable, such as the reality of the world and the basic laws of logic. Knowledge can be obtained through reasoning, sense data, religious experience, and information from reliable sources.
2. Truth is objective and universal. Truth corresponds to reality. This correspondence view of truth is undeniable since any denial would imply that it (the denial) corresponds to reality.
3. Truth can be conveyed through human language. This is undeniable since to deny it through language would affirm the proposition being denied.
4. There are good reasons to believe that a personal, intelligent, good, powerful, transcendent, immutable, eternal God exists.
  - a. The universe began and thus had a supernatural and immensely powerful transcendent cause.
  - b. A totally independent being must exist to ground in existence all caused, dependent beings.
  - c. Life is based on highly-specified complex information which, from our uniform experience, comes only from intelligence. Since chance and necessity fail to explain the fine-tuning of physics and the complex genetic language of life, design is the only other option.
    - i. the exquisite fine-tuned constants and values of physics that allow any life in the universe (that allow chemistry and matter)
    - ii. the highly-complex, molecular, genetic language that instructs the building and replication of all living organisms
  - d. Humans have a mind, consciousness, free will, love, and a sense of moral awareness and human dignity which are best explained by a personal, thinking, loving, moral law-giver. Music, mathematics and the applicability of mathematics to the physical world are also best explained by God rather than by coincidence.

All atheistic arguments to explain the outer world of nature and the inner world of personhood fail. All atheistic arguments against God's existence fail.

# Evidence for Faith

## Why Biblical Christianity is True and all Opposing Views are False

5. If God exists, miracles are possible. The world system cannot merely be assumed to be closed. Laws of nature are descriptive (*describing* what normally occurs), not prescriptive (*prescribing* what must occur). A miracle would not be a violation of the laws of nature but a suspension of the normal laws for a higher supernatural law.
6. There is intellectual and practical incentive to investigate Jesus of Nazareth because of the claims he made about himself, what is at stake for all people, and his world-transforming influence. Furthermore, many competing worldviews and religions are eliminated as viable candidates for explaining physical reality based on number 4 above (e.g., atheism and pantheism).
7. The earliest historical documents concerning Jesus are reliable. They firmly establish key facts about Jesus' death and reported resurrection. The very early creeds of Jesus' followers show that central Christian doctrines (such as the vicarious atonement and bodily resurrection of Jesus) were not fabricated over multiple generations as legends require.
  - a. Jesus was crucified to death on a Roman cross
  - b. Jesus was buried
  - c. The tomb was empty three days after his burial
  - d. The apostles give credible eye-witness testimony to many post-mortem appearances of Jesus
  - e. The disciples of Jesus sincerely believed that Jesus rose from the dead
8. The best explanation of these historical facts is that Jesus miraculously rose from the dead by the power of God. All other explanations fail.
9. There are good historical reasons to believe Jesus made many extraordinary claims about himself. Based on these claims, Jesus is either a liar, a lunatic, or Lord. Someone who is merely a good teacher or good man does not make such claims. Jesus' resurrection, which he had predicted, validates that he is who he claimed to be: God.
10. If Jesus is God, his view of scripture is correct and should be accepted.
11. Jesus had a high view of scripture, addressing scripture as God's word.

# Evidence for Faith

## Why Biblical Christianity is True and all Opposing Views are False

12. Jesus taught the preservation of scripture, including the Old Testament, His own words, and more truth that He would give his apostles after he left. He said he would send the Holy Spirit and build his invincible church to carry the record of himself throughout all generations. By the providential guidance of the Holy Spirit, Jesus' church has been able to recognize, preserve, and teach the Old and New Testament scriptures.
13. The text of the Bible communicates objective truth that can be understood. Some parts are difficult to understand, but not impossible. Continued growth in understanding comes through praise, prayer, humility, study, and obedience. Also, since God used human writers to pen his word in human language to communicate to human beings, valid principles of human language interpretation and application should always be observed.
14. All other major worldviews and religions contradict some of the major teachings of Biblical Christianity (e.g., major teachings such as God is transcendent and immanent, all people need salvation, Jesus is truly God and truly man, Jesus died for the sins of the world, Jesus rose bodily from the grave, and salvation is only by the grace of Christ through faith in Christ—not by works).
15. Therefore, Biblical Christianity is the one and only true faith. All biblical doctrines are true. All teachings that contradict biblical doctrines are false.
